

# SCS-800 Series

## Cables and Accessories

Alligator Technologies can provide a complete connection solution to ease the integration of the SCS-800 Series into the sampling system. Listed below are our standard accessory options. Some of these are configured specifically to match the connection to the input sensor or output device. We can also build complete custom solutions to match the sampling system requirements. Please refer to the Price List for part numbers and ordering details.

### **SCS-STA-81X and SCS-STA-82X**

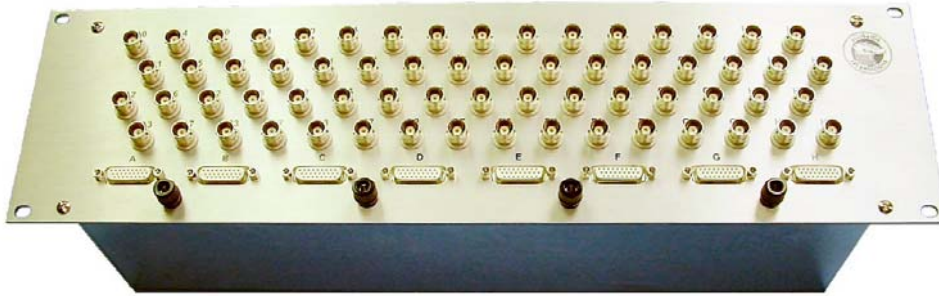

Screw Terminal  
Accessory  
Input/Output. One  
SCS-STA is required  
for each module  
board in the system.

**CAT-81X and CAT-82X** terminated and unterminated cables for connecting to the STA screw terminal accessory or to the SCS-BNC-64 BNC break out panel

### **Alligator Technologies**

**SCS-BNC-64** BNC Rack Mount Accessory has 64 BNC connectors organized in groups of 8. Each group can be configured as input or output by connecting the appropriate CAT-8XX cable between the BNC panel and the SCS module input or output connector.

**SCS BNC-8XX-Y-Z** 8-channel BNC Accessory Box can be ordered for input or output in a variety of configurations specifically wired for differential or single-ended.
